Practicum No.1 **Date:…….**

Static HTML Web Page

I Practical Significance *(with respect to practicum no. 1)*

Developing a static HTML page using basic HTML elements, lists, tables, formatting, and image elements is a fundamental skill in web development that plays a crucial role in building structured and visually informative websites. By applying basic HTML tags, developers can create well-organized content layouts, while list elements help in presenting data in an ordered or hierarchical manner. Table elements are essential for displaying structured data such as schedules or comparison charts. Formatting tags enhance readability by emphasizing important content, and image elements add visual appeal and context to the page. Mastering these core components empowers learners to construct effective and user-friendly web pages that serve diverse industry needs such as e-commerce catalogs, informative blogs, portfolio pages, and documentation portals.

II Competency and Industry-Specific Practical Skills *(Kindly copy from the Course Structure)*

This practicum exercise is expected to develop the following skills for the industry-identified competency.

- ***Develop*** interactive web applications.

a) ***Use*** suitable HTML tags for well-structured static web page. *(Psychomotor Domain Outcome)*
b) ***Practice*** safe coding and good privacy habits. *(Affective Domain Outcome)*
c) ***Adhere*** to laboratory safety protocols. *(Affective Domain Outcome)*
d) ***Interpret*** the observations and results. *(Cognitive Domain Outcome)*

III Relevant CO(s) *(Kindly copy from the Course Structure)*

CO 1. ***Develop*** well-structured web pages using HTML5 elements.

IV Practical Outcome (PrO) *(Kindly copy from the Course Structure)*

- ***Develop*** a static HTML page for ***the given*** task.

V Related ADO(s) *(Kindly copy from the Course Structure)*

a) ***Follow*** ethical coding standards and responsibilities.
b) ***Practice*** persistence in styled designs.
c) ***Adopt*** a self-learning approach to web frameworks.
d) ***Engage*** and cooperate in collaborative coding projects.

VI Minimum Underpinning Theory *(Theory should be written only to relate this practicum)*

To develop a static HTML page effectively, it is essential to understand the foundational structure and syntax of HTML. This includes the use of basic elements such as headings (<h1> to <h6>), paragraphs (<p>), line breaks (
), and divisions ( ) to organize content logically. List elements like <ul>, <ol>, and <li> are used to present information in ordered or unordered formats, while table elements such as <table>, <tr>, <th>, and <td> allow for the structured display of data. Formatting elements like <b>, <i>, , and are employed to enhance the visual emphasis and readability of text. Additionally, image elements (<img>) enable the inclusion of visual content by specifying the image source (src) and alternative text (alt) for accessibility. Understanding these core components equips learners with the skills needed to build clean, organized, and informative static web pages.

VII Practicum Set-up/Circuit Diagram/Algorithm/Flowchart/Sample Layout

MY RESUME PAGE

Career Objective

A Career Objective or a Resume Objective is essentially a heading statement that describes your professional goals in two to three sentences. Employers looking to hire an employee for a position tend to seek candidates that are driven enough to understand what they want.

Academic Profile

Education	School / College	Board / University	Percentage of Marks	Year of Passing
B.Tech				
HSC				
SSLC				

Technical Skills

1. Data Structures
2. Computer Networks
3. Web Technology
4. Python Programming
5. Java Programming

Advanced Technology Skills

- Data Science
- Data Analytics

VIII Resources Required

S. No.	Name of Resource	Suggested Broad Specification	Quantity
1	Hardware	Minimum Intel Core i5/i7 with 8GB RAM and 256GB SSD, Linux-based or Windows-based machines	1 No.
2	Text Editor	Microsoft Visual studio (VS Code), Version-1.68	1 No.

IX Safety Precautions

a) ***Keep*** Liquids Away from Equipment:
b) ***No*** Food or Snacks
c) ***Use*** Equipment Properly
d) ***Maintain*** Proper Posture
e) ***Avoid*** Overloading Power Outlets
f) ***Follow*** institutional laboratory policies.
g) ***Avoid*** storing confidential data in lab computers.
h) ***Use*** equipment only for academic purposes

X Procedure

1. ***Start*** with a standard HTML5 structure.
2. ***Use*** <h1>, <p>, <b>, and <img> for personal details and image.
3. ***Use*** <a> tags to simulate website and social media links.
4. ***Use*** headings and paragraphs for formatted text.
5. ***Use*** the <table> tag with <tr>, <th>, and <td>.
6. ***Use*** ordered list (<ol>) for technical skills.
7. ***Use*** unordered list (<ul>).
8. ***Finish*** your document.

XI Actual Resources Used (*To be filled by the students*)

S. No.	Name of Resource	Broad Specification	Quantity	Remarks (If any)
1	Operating System	Windows-based computer	1	
2	Programming Language	HTML5	1	
3	Software Development Kit	Not required 1 14 5 6	-	
4	Libraries	Not used	-	
5	Graphics/Animation tool	Not used	-	
6	Front-end tool	HTML / text editor	1	
7	Back-end tool	Not used	-	
8	Virtual Lab	Not used	-	
9	Specific Hardware	Desktop/laptop computer	1	
10	Simulation/Emulation Tool	Not used	-	

XII Actual Procedure Followed (*To be filled by the students on the left page*)

1. Created the HTML5 page and added the title and main heading.
2. Entered personal information, career objective, image and hyperlinks.
3. Created the academic profile table and added technical and advanced technology skill lists

XIII Observations (*To be filled by the students on the left page if space is not sufficient*)

1. The page is organized using basic HTML elements.
2. The academic profile is represented in a table and skills are represented using lists.
3. The supplied HTML references an image file named pro1.jpeg.

XIV Results (*To be filled by the students)*

1. A static resume webpage titled “MY RESUME PAGE” was created.
2. The page contains personal details, links, an academic profile table and skill lists
3. The required basic HTML elements were demonstrated

XV Interpretation of Results (*Students to state the meaning of the above-obtained results/observations*)

The results show that basic HTML tags can be combined to structure a complete static webpage.

Tables are useful for academic records, while ordered and unordered lists organize skill information.

The exercise demonstrates the intended use of HTML elements for a simple resume page.

……
……..……...
……
……..……...

XVI Conclusions (*Students to draw conclusions (or take decisions) based on the interpretation of results*).

The practicum successfully demonstrated the creation of a static HTML resume page.
……
Basic HTML headings, paragraphs, formatting, image, hyperlinks, table, ordered list and unordered list were applied to organize
……....
and present information ……
……..……...
……
……..……...

XVII Suggested Practicum Related Questions:

Note: *Below given are a few sample questions for reference. Teachers must design more such questions in order to ensure the achievement of pre-determined course outcome.*

1. What does HTML stand for?
2. What is the purpose of the `<html>`, `<head>`, and `<body>` tags?
3. What is the role of the `<title>` tag in an HTML document?
4. What is the difference between `<b>` and `<strong>` tags?
5. How does the `<i>` tag differ from `<em>`?
6. What is the use of `<br>` and `<hr>` tags? Are they self-closing?
7. How do you create a hyperlink in HTML?
8. What is the syntax of the `<a>` tag and what are its main attributes?
9. What is the difference between block-level and inline-level elements?
10. What are semantic HTML tags? Give examples.
11. What is the difference between `<div>` and `<span>`?
12. How do you insert an image in HTML? What are the required attributes?
13. What is the purpose of the `alt` attribute in an `<img>` tag?
14. How can you add comments in HTML?
15. What do you understand by Doctype declaration (`<!DOCTYPE html>`) in HTML?
16. Which tag is used to create a table in HTML?
17. What is the difference between `<th>`, `<tr>`, and `<td>` tags?
18. How do you create a table with 3 rows and 3 columns in HTML?
19. What are the attributes used with the `<table>` tag to improve its layout?
20. How do you merge cells in a table? Explain `colspan` and `rowspan`.
21. What is the purpose of the `<thead>`, `<tbody>`, and `<tfoot>` tags?
22. How do you add a border to a table in HTML?
23. Can we nest tables within tables in HTML?
24. How can you align the content inside a table cell?
25. How would you add padding and spacing between table cells?

XIX Suggested Assessment Scheme

The given performance indicators should serve as a guideline for assessment regarding process and product-related marks.

Note: The weightage for the ***process-related skills*** and ***product-related skills*** will change depending upon the PrO, COs, and competency related to the concerned course.

Performance indicators		Weightage	Marks Obtained
Process related skills: 18 Marks - 60%			
1	Analyze Content Requirements	10%	
2	Design Page Structure	20%	
3	Code Using HTML Syntax	20%	
4	Debug and Validate Code	10%	
Product related skills: 12 Marks - 40%			
5	Web Page Layout Design	10%	
6	Content Presentation	10%	
7	Browser-Compatible Output	05%	
8	Final Static Webpage Output	05%	
9	Oral viva examination	05%	
10	Submission of code and report on time	05%	
	Total	**100 %**

HTML STRUCTURAL DIAGNOSTICS

Total Errors: **0** | Total Warnings: **15** | Rules Checked: **35**

Detected Diagnostic Issues:

- **Line 9 [WARNING - opt-attr]:** `<form>` tag is missing an `action` attribute.
- **Line 13 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 17 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 24 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 28 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 32 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 37 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 41 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 45 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 49 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 53 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 57 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 61 [WARNING - opt-attr]:** `<label>` tag should have a `for` attribute linked to input ID.
- **Line 1 [WARNING - missing-lang]:** The root `<html>` tag should declare a language attribute (e.g. `<html lang="en">`).
- **Line 1 [WARNING - missing-charset]:** Missing `<meta charset="UTF-8">` inside <head>.
